A collection of wounded parents, whose children have died from a drug overdose or suicide related to substance abuse, came together on the website GriefNet.org. Each one was damaged by misplaced blame and guilt because they couldn't rescue their children. So deeply filled with sorrow they were unable to find a life after death. They have become a family-in-grief, crying together and comforting one another. The public must be educated to the reality of the War on Drugs. There are people who still believe in the 'junkie' stereotype. Many presume, that, these children were weak willed and deserved what was coming to them. Some people are judgmental, uneducated, mean spirited, or have blinders on. Drugs created a helplessness, in these children, that is hard for outsiders to understand. Kicking the drug habit is incalculably difficult! Also powerless are the secondary victims, those who are left behind to cope with the losses this dreadful disease has caused. Each child that died left behind a parent whose life is now changed forever. They cannot erase the horror of that moment when they first heard that their child had died. The nightmares and the visions of their children dying continue to haunt them.

Seth Joe-Bob Dancer, gunfighter, road agent, and killer was now a rancher, devoted husband, and father of two sons, one nineteen; and they were his life! Having left who he once was far behind him, his new role in life was one of happiness and most times uneventful, that is until his eldest son was murdered in Dallas, Texas, and his youngest blamed for the crime! Dancer had changed his name before the Civil War on the day he married Laura and, together, raised two strapping sons. He had not worn his gun since war's end, had in fact not thought of his violent past, until now! He had not fired the sidearm in almost eighteen years, but now, his son was innocent, and the only way to save him was to find the real killer. But how? Dallas was a town almost completely under the thumb of organized crime, and the law was either helpless to combat it or was on the syndicate bosses had possession of the proof! Seth Mabry remembered only one thing from his mother's Bible teachings, and that one thing became his religion. He believed in an eye for an eye, and if he was wronged, he would collect! In the same format and style of his prize-winning Shallow Waters, William Sargent's latest book chronicles a year spent exploring the North Woods of New Hampshire. Through words and lucid explanations, Sargent joins the company of Lewis Thomas and Stephen Jay Gould as a first rate interpreter of modern science" investigates a new area's geology,

ecology, and natural history. Centered primarily in the Franconia Notch, the book ranges to include Mount Washington Observatory, Hubbard Brook Experimental Forest, Palermo Mine, and New Hampshire Audubon's Peregrine Tagging Program. In a series of lyrical chapters, Sargent takes readers into vernal ponds and moose yards, up mountain summits and into the dens of hibernating bears. He shows that the present pattern of evergreen and deciduous trees we think of as natural is actually the result of centuries of human alteration. Describing how humans have become the newest geophysical force shaping our planet, he ruminates on how well the earth's immune system can withstand the onslaught. Offering up-to-date science on the geology and biology of New England, A Year in the Notch explains the interaction between life, rocks, and water -- the intricate dance that keeps our planet that keeps our planet to the newest geophysical force shaping our planet to the newest geophysical force shaping our planet, he ruminates on how well the earth's immune system can withstand the onslaught. The Gentle Season Thalia: A Texas Trilogy

Static Control

Elephant Lake Fossil Energy Update

This book examines the history, politics, and economics of alternative energy. Since the energy crisis of the 1970s, governments around the world have subsidized and otherwise incentivized alternative forms of energy to reduce dependence on fossil fuels. This search has taken on added urgency in the twenty-first century, as the specter of climate change has engendered ambitious state-level renewable portfolio standards, enhanced federal incentives, and inspired "100% renewable" electrical generation targets in such states as Vermont and Hawaii. To save the planet from destruction, wind, solar, and other renewable energy alternatives must replace fossil fuels. But how did we get here and what is the cost? After an in-depth study of the Carter administration's synthetic fuels program, the focus shifts to the two most prominent, perhaps most promising, and certainly most promising, and drawn the most controversy, it receives the most attention. Although the primary focus is on the American experience with renewable energy, the policies and politics of renewables in Scotland, Wales, Denmark, Spain, and other European nations are also discussed. Issues considered in the book include the nature and efficacy of renewable subsidies; the employment of federal and state tax codes to encourage renewables; the lobbies and interest groups that campaign for government support of renewables; and the fierce battles over the siting of renewables; and the fierce battles over the siting of renewable facilities. Unlike other works on this subject, the book probes in depth the nature of the opposition to wind and solar, both in the matter of siting and in their worthiness as recipients of substantial and assistance.

The renaissance of Larry McMurtry, "an alchemist who converts the basest materials to gold" (New York Times Book Review), continues with the publication of Thalia. Larry McMurtry burst onto the American West. His first three novels—Horseman, Pass By (1961),* Leaving Chevenne (1963), and The Last Picture Show (1966)— all set in the north Texas town of Thalia after World War II, are collected here for the first time. In this trilogy, McMurtry writes tragically of men and women trying to carve out an existence on the plains, where the forces of modernity challenge small- town American life. From a cattleranch rivalry that confirms McMurtry's "full- blooded Western genius" (Publishers Weekly) to a love triangle involving a cowboy, his rancher boss and wife, and finally to the hardscrabble citizens of the West like no one else. With a new introduction, Thalia emerges as an American classic that celebrates one of our greatest literary masters. *Just named in 2017 by Publishers Weekly the #1 Western novel worthy of rediscovery.

High Stakes Nicodemus Turner was in a bind. Not only had the handsome gambler just found out that he had a daughter he'd never met, but in order to get custody he had six months to become a proper father and marry. The solution: a poker game where the prize was a full house. Nick was Aly's closest companion, her best fishing partner, and he could make her insides go mushy with one lingering glance. That still didn't mean she would up and marry him just like that -- poker game or no. But that mushy feeling came back every time she brushed
