***As humanitarian aid organizations have evolved, there is a growing recognition that incorporating palliative care into aid efforts is an essential part of providing the best care possible. A Field Manual for Palliative Care in Humanitarian Crises represents the first-ever effort at educating and providing guidance for clinicians not formally trained in palliative care in how to incorporate its principles into their work in crisis situations. Written by a team of international experts, this pocket-sized manual identifies the needs of people affected by natural hazards, political or ethnic conflict, epidemics of life-threatening infections, and other humanitarian crises. Later chapters explore topics including pain management, skin conditions, non-communicable diseases, palliative care emergencies, the law and ethics of end of life care, and more. Concise and highly accessible, this manual is an ideal educational tool pre-deployment or during fieldwork for clinicians involved in planning and providing humanitarian aid, local care providers, and medical trainees.***

***Recasting burnout as a crucial phase of service, Building Resilience Through Contemplative Practice uses real-world case studies to teach professionals and volunteers unique skills for cultivating resilience. Viewing service and burnout as interdependent throughout phases of stability, collapse, reorganization, and exploitation, the book uniquely combines elements of adaptive resilience theory with contemplative practices and pedagogies. Drawing on the author's extensive experience working at the intersection of service and contemplative practices, this is the first book to demonstrate how and why professionals and volunteers can reframe burnout as an opportunity for resilience-building service. User-friendly case studies provide tools, skills, and exercises for reconstructive next steps. Chapters address personal, group, and structural levels of service and burnout. Illuminating the link between adaptive resilience and burnout as a normal and useful phase of service, Building Resilience Through Contemplative Practice is a necessary resource for professionals and volunteers across a wide range of service settings. ***Chemical Warfare Agents, Second Edition has been totally revised since the successful first edition and expanded to about three times the length, with many new chapters and much more in-depth consideration of all the topics. The chapters have been written by distinguished international experts in various aspects of chemical warfare agents and edited by an experienced team to produce a clear review of the field. The book now contains a wealth of material on the mechanisms of action of the major chemical warfare agents, including the nerve agent cyclosarin, formally considered to be of secondary importance, as well as ricin and abrin. Chemical Warfare Agents,***

***Second Edition discusses the physico-chemical properties of chemical warfare agents, their dispersion and fate in the environment, their toxicology and management of their effects on humans, decontamination and protective equipment. New chapters cover the experience gained after the use of sarin to attack travellers on the Tokyo subway and how to deal with the outcome of the deployment of riot control agents such as CS gas. This book provides a comprehensive review of chemical warfare agents, assessing all available evidence regarding the medical, technical and legal aspects of their use. It is an invaluable reference work for physicians, public health planners, regulators and any other professionals involved in this field. Review of the First Edition: "What more appropriate time for a title of this scope than in the post 9/11 era? ...a timely, scholarly, and well-written volume which offers much information of immense current and...future benefit." —VETERINARY AND HUMAN TOXICOLOGY***

The United States Department of Defense Law of War Manual: Commentary and Critique provides an irreplaceable resource for any politician, international expert, or military practitioner who wishes to understand the approach taken by the American military in the complex range of modern conflicts. Readers will understand the strengths and weaknesses of US legal and policy pronouncements and the reasons behind the modern American way of war, whether US forces deploy alone or in coalitions. This book provides unprecedented and precise analysis of the US approach to the most pressing problems in modern wars, including controversies surrounding use of human shields, fighting in urban areas, the use of cyberwar and modern weaponry, expanding understanding of human rights, and the rise of ISIS. This group of authors, including academics and military practitioners, provides a wealth of expertise that demystifies overlapping threads of law and policy amidst the world's seemingly intractable conflicts.

Manual of Ovulation Induction and Ovarian Stimulation Protocols encompasses all aspects of ovulation induction and current stimulation protocols in detail. This detailed text provides the reader with a reliable overview of the principles involved and the management required for ovulation induction in the treatment of infertility. This book is comprised of 68 chapters which cover the tailoring of ovarian stimulation regimens to a patient's medical history and previous response to treatment. Both the clinical and sonographic findings in evaluating ovulatory function and dysfunction are discussed in detail. Methods for monitoring folliculogenesis, which in turn allows the ART specialist to accurately predict the number, as well as the timing of the high quality of oocyte retrieval, are discussed in detail. The book features discussion on basic and clinical research evidence, which is accumulating to propose the future use of recombinant FSH and LH in order to achieve controlled ovarian stimulation. The inclusion of the most current research in this second edition makes Manual of Ovulation Induction and Ovarian Stimulation Protocols a valuable book for gynaecologists, infertility specialists, and healthcare professionals dealing with IVF. Key Points Includes current research and future implications 60+ full colour images and illustrations New edition. First published 2005

Homeland Security Austere Emergency Medical Support (AEMS) Field Guide** The following protocols outline the emergency medical support that can be administered under austere conditions by emergency medical services (EMS) providers credentialed by the Department of Homeland Security (DHS) Office of Health Affairs (OHA). These protocols are intended to supplement the DHS/OHA Basic Life Support (BLS) and Advanced Life Support (ALS) protocols when providers are operating in austere environments. The protocols guide the management of individual patients while considering the circumstances under which patient evaluation and treatment may occur. Any given patient may require the use of a single protocol, a portion of a protocol, or a combination of several protocols. OHA expects that providers will use the protocols to assess, and to establish a treatment plan for each patient.
