

Hamilton Beach Commercial Coffee Maker Manual

Okay, time for a little confession. Three things: 1. I spent about forty years writing ads and commercials for various advertising agencies, and for about 85% of that time I absolutely loved it. 2. For the other 15% of the time, I absolutely hated it. 3. But in spite of the disasters involved in that 15%, I wouldn't have traded jobs with anyone. Not even the President of the United States. But why in the world had I chosen to do it all in Minneapolis? Beats me. Minneapolis, as you probably know, is in Minnesota. And Minnesota means unusual weather, to say the least. In June—which is when I decided to take the job—there are several wonderful days. Maybe four or five. But the rest of the time it's mostly winter. With snow up to your ears and the thermometer plunging helplessly. And that was only the beginning of the problems...

Finally. A comprehensive collector's book and historical reference containing everything there is to know about antique and vintage electric waffle irons and the companies that made them. The author, a former science teacher, precision scientific instrument maker, and writer, has for years collected, researched, restored, and in some cases written about everything from antique pocket watches and cameras to old radios and vintage automobiles. Bill's passion for antique electric appliances has led to this first-of-its-kind book. The author's collection of waffle makers, all meticulously restored to like-new condition, numbers in the hundreds. In this book he shares with the reader everything he's learned over the years about these little marvels and the companies and people that created them. This 258 page book is profusely illustrated with never-before-published materials about waffles and waffle irons including patent drawings, historic paintings, factory-issued literature, and vintage photos and advertisements. Also included are hundreds of informative photos of restored waffle irons from the author's personal collection along with rare and unusual examples from the collections of noted toaster and appliance aficionados from around the country. This is no ordinary collector-type picture book. It's the culmination of hundreds of hours of research into the history of the electric appliance industry in 20th century America. Through exclusive interviews with the heirs of company founders, with former employees, and with archivists, historians, and librarians, the author has been able to compile in-depth histories of over 85 appliance manufacturers and retailers. For the first time the reader will find detailed biographies of many of the men who founded and ran the companies that gave the world the toasters, the ovens, the grills, and the other kitchen appliances that today we all take for granted.

Have you completed your DNA heritage test? Yes--Bad idea? No--Good decision? In *The God Gene*, writer Stuart Thomas has been asked by his editor to write a story about DNA testing. Stuart starts by submitting his DNA to the 6Steps labs in order to discover his ancestry. He discovers much more. 6Steps CEO, Dr. Anthony Shields, has discovered the formula to cause your genes to attack your own body. After identifying your heritage, he studies your genetic haplogroup to see what disease(s) your heritage is most susceptible to. Could you be under attack? Dr. Shields is moving the operation to Hamarsen, a small ghost town in South Dakota. Stuart's friend, Joyce Jantzen, is working at a national park a short distance from Hamarsen and has alerted Stuart that the good doctor has purchased the ghost town. A secret organization, JASS (the Jewish American Security Service), is trying to prevent 6Steps from carrying on an attack on the Jewish people. JASS has encouraged a reluctant Stuart to help them prevent this attack. Can Stuart save the day? Will Yahweh, the Jewish God, work his miracle magic to once again save his people? The God Gene will answer all your questions.

November, 1958. A sunny day and I was feeling pretty good about things. I'd been writing ads and commercials in Chicago for over eight years, and found it both rewarding and satisfying. Heck, I'd only been fired once. Even that wasn't all that horrible; my boss offered to cancel the firing, but I told him to forget it. Who wants to work for a guy who's just fired you? So that day I was on my way to my new job at Grant Advertising.

Good job, good agency. Things looked terrific. But how was I to know that in a year I'd be transferred to the Detroit office to work on the big Dodge account? And how was I to know we'd lose the account within days and transfer me to the New York office? And how was I to know that New York would be fun for a while and then a pain in the neck? And how was I to know—? Well, you get the idea. And I hope you enjoy coming along.
