project developers, investors, tenants, hotel operators and financiers in order to make decisions with regard to a specific hotel project. The preparation of a feasibility

Getting hold of information and the appropriate

However, the
hospitality

specifically
put on the
hospitality
industry. This
means that
feasibility
evaluation for
other types of
project
development in
the tourist
industry is not
subject to this

study. The aim of the thesis is on the one hand to point out aspects that have to be taken into consideration in any study, and to give suggestions for improvements on the other hand.

The author has laid down the following four hypotheses that serve as the main source for the research questions. -

Hypothesis 1:
The sensitivity analysis is the most important component of a

Hypothesis 2: A
