De Surinaamse Sandra woont in een achterstandswijk. Ze gaat als enige uit haar wijk naar het zelfstandig gymnasium. Alles op 'het gym' is anders dan ze gewend is. Haar klasgenoten zitten op hockey, praten onverstaanbaar bekakt en hebben belachelijke namen als Jojanneke en Liselotte. Hoe moet Sandra omgaan met de kakkers die ze nu vrienden noemt? En wat moet ze doen met die ene klasgenoot die vastberaden is haar het leven zuur te maken? Sandra vecht voor een plek in een wereld waarin oude regels niet meer gelden en nieuwe regels volkomen onbegrijpelijk zijn. Het gym is een briljant en schrijnend verhaal over de multiculturele kramp van Nederland, eindelijk eens van binnenuit en met ongelooflijk veel humor beschreven door een van Nederlands meest getalenteerde schrijvers. Karin Amatmoekrim publiceerde eerder drie romans, die allemaal lovend werden ontvangen door de pers. Voor haar laatste roman Titus (2009) won ze de Black Magic Woman Literatuurprijs. Ze schrijft regelmatig voor nrc.next, De Groene Amsterdammer en de Volkskrant. 'Amatmoekrim schrijft direct, precies en dwingend.' vrij nederland 'Amatmoekrim blijft de nieuwsgierigheid prikkelen.' de volkskrant

This volume includes the lectures and selected posters on different aspects of biological effects of EMF, presented at the NATO ADVANCED RESEARCH WORKSHOP “The mechanisms of biological effect Extremely High Power Pulses (EHPP)” (3-5 March 2005) and the UNESCO/WHO/IUPAB Seminar “Molecular and Cellular Mechanisms of Biological Effects of EMF” (1-2 March 2005) that took place in Yerevan, Armenia. The gracious support of several international organizations made possible to bring together 47 scientists, engineers, physicians and policy makers from 21 countries from Europe, North and South America, Asia. The Capital of Armenia, Yerevan, provided an excellent opportunity for discussions of the experimental data and theoretical models of EMF effect on various levels, starting from cell aqua bathing medium to the whole organism, including the human, applying multidisciplinary approaches. The continuous increase of the number of man made EMF sources leads to dramatic changes in the spectrum of EMF in the biosphere. During the last two decades the public concern about potential hazard of EMF generated by power and distribution lines, as well as mobile communications and base stations have initiated serious public concern and has triggered the attention of the WHO, which reflected in the EMF project of harmonization of standards. At the same time, contemporary medicine largely uses EMF diagnostic methods. The beneficial effects of EMF are complemented with a large scale of EMF therapeutic modalities used in a number of countries, helping millions of people.

Dosimetry refers to the calculation and assessment of the radiation dose received by the human body. The proposed book will place emphasis on the existence of physical and biophysical dosimetry. It will be discussed for the proper description and evaluation of the signal at the power generation system. It will cover in detail 10 different parameters of EMF (electromagnetism) exposure such as amplitude, frequency, vector, time of exposure, orientation, etc. In most published papers, these parameters are not well defined.

TRAC: Trends in Analytical Chemistry, Volume 9 provides information pertinent to the trends in the field of analytical chemistry. This book discusses a variety of topics related to analytical chemistry, including flow chemography, condensation polymers, sedimentary organic matter, nucleosides, and fuzzy expert systems. Organized into 43 parts encompassing 87 chapters, this volume begins with an overview of particle induced X-ray emission and its analytical applications. This text then discusses direct memory access data acquisition, which is an efficient method of collecting data from analytical instrumentation. Other chapters consider the application of flow injection analysis in industrial research laboratory. This book discusses as well the utilization of the time-of-flight mass spectroscopy method. The final chapter deals with brassinosteroids, a group of steroidal plant growth substances that possess B-ring lactone and two vicinal diols. This book is a valuable resource for analytical chemists, biochemists, molecular biologists, physicists, engineers, scientists, and researcher workers.

The book reviews the current state of knowledge on the chemical and physical processes occurring in the environmental media (i) the atmosphere, (ii) the aqueous phase and (iii) soil and identifies the strengths and weaknesses of the chemical mechanisms (both explicit and condensed) currently available to simulate the multimedia environmental chemistry of volatile organic compounds (VOCs) and particulate matter in these media. Contributions examine how well this knowledge has been incorporated into different types of CT models and appraise the current status and significant issues in the development and usage of the models. Model simulations of some real world chemical perturbations to the Earth system are presented which appraise the performance of the models in relation to "real world" observations. Serious caveats in our understanding of chemical processes and their simulation in the various compartments of the Earth system are highlighted and areas are identified that need urgent improvement, in particular with respect to environmental security.

Vanavond heb ik een grens overschreden, en als vader gelijk heeft, is terugkeren onmogelijk... Als Amelia Gray tegen haar zin betrokken raakt bij het onderzoek naar de moord op een rechercheur, komt ze John Devlin ook weer tegen. Ze is nog steeds gek op hem, maar ze weet dat ze, door contact met hem te hebben, met krachten te maken krijgt die levensbedreigend voor haar zijn. Afstand houden, dus! Tot blijkt dat hij

de enige is die haar kan helpen, en ze hem noodgedwongen weer moet toelaten in haar leven... 'Goed verteld, knap doordacht.' - NBD Biblion

The North Atlantic Treaty Organization (NATO) has sponsored research supporting development of personnel safety standards for exposure to Radio Frequency Radiation (RFR) for over a quarter century. NATO previously recognized that one of the most important tools used in the RFR effects research laboratory is accurate dosimetry when it supported a NATO Advanced Studies Institute (ASI) on Advances in Biological Effects and Dosimetry of Low Energy Electromagnetic Fields held in 1981, in Erice, Sicily. That meeting resulted in a NATO ASI publication; Biological Effects and Dosimetry of I Non-ionizing Radiation: Radiofrequency and Microwave Energies . The most recent NATO sponsored program on RFR was an Advanced Research Workshop (ARW) on "Developing a New Standardization Agreement (STANAG) for Radio frequency Radiation" held May 1993, at the Pratica di Mare Italian Air Force Base, Pomezia (Rome) Italy. That ARW produced an ASI proceedings, published in 1995: Radio frequency Radiation Standards, Biological Effects, Dosimetry, Epidemiology, and Public Health Policy2. The Rome ARW and the Proceedings served as a springboard to the much needed revision of the NATO Standardization Agreement (STANAG) 2345 MED "Evaluation and Control of Personnel Exposure to Radio Frequency Fields - 3 kHz to 300 GHz,,3, which was subsequently promulgated in October 1998. One of the published recommendations developed by the Rome ARW was to hold this second ARW focusing on dosimetry and measurements.

De zomer op Elm Creek Quilt kamp loopt weer op zijn einde en Bonnie ziet op tegen de eenzame winter nu haar quiltwinkel is gesloten en met een scheiding in het vooruitzicht. De onverwachte uitnodiging van Claire om haar op Hawaï te komen helpen bij het opzetten van een quiltkamp komt precies op het goede moment. Al snel raakt Bonnie verzeild in vele avonturen. Maar dan besluit haar overspelige echtgenoot dat hij zijn aandeel in Elm Creek Quilts terug wil en brengt zo haar financiën en dierbaarste vriendschappen in gevaar. Gelukkig maakt ze ook nieuwe vrienden, zoals Hinano Paoa, de eigenaar van de plaatselijke muziekwinkel. Door hem leert Bonnie de tradities en cultuur van Hawaï kennen en ontdekt ze totaal onverwacht opnieuw de liefde.
